Expertise you trust, a legacy of impact

WICE is a global organization, originally founded in 1989, dedicated to advancing sustainable development and inclusive solutions across critical international development sectors. With roots in environmental stewardship, WICE has evolved to also champion innovation

WICE is a decentralized consulting firm structured as a collective of professionals, with a core focus on building innovative solutions for sustainable international development. WICE provides brand power, shared infrastructure, and access to a mission-driven network of experts — many of whom are seasoned USAID professionals — aiming to carry forward and expand critical work for long term economic impact.

Through strategic partnerships with

and expertise in global health, agriculture, climate resilience, public/private sector partnerships, and humanitarian assistance.

governments, NGOs, academic institutions, and the private sector, WICE delivers evidence-based solutions that are locally informed and globally impactful. Its programs span applied research, policy advisory, technical assistance, and capacity-building — ensuring that underserved communities, including women and marginalized populations, play an active role in shaping and sustaining their futures.

Areas of work

WICE delivers innovative solutions in health, environment, governance, economic development and food

security, for a sustainable future.

Environment and Energy Solutions

By partnering with the private sector, academic institutions, governments and community stakeholders WICE builds long term, cost-effective investments that are grounded on protecting ecosystem services and protecting the environment while ensuring long term economic returns for communities.

Sustainable Food Systems

WICE works across the food system to optimize resources to reduce waste, promote regenerative agriculture, and prioritize local food economies through implementing food production, distribution, and consumption practices that minimize environmental impact while supporting human health, and social equity.

Health and Nutrition

WICE strengthens healthcare systems, promotes sustainable healthcare practices, enhances access to nutritious food, and supports innovations that address malnutrition and disease prevention by partnering with governments, NGOs, and private sector entities.

Economic Development

Public Private Sector Partnerhips

Policy and Governance

By advancing economic development through market-based solutions, investment readiness, and sustainable growth strategies, WICE supports clients in designing inclusive economic policies, revitalizing value chains, and mobilizing capital for high-impact sectors.

WICE facilitates public-private partnerships by aligning government priorities with private sector innovation and investment. WICE provides collaborative deal structuring and advisory services, and helps build capital to deliver sustainable impact.

WICE supports policy agenda setting, institutional infrastructure, and governance by strengthening institutional frameworks, designing effective policies, building capacity and enhancing transparency.

Projects

See our projects

WICE has projects around the globe that aim to create lasting environmental and social impacts by promoting sustainable economic growth through empowering local communities.
